

Along with group of cars footages from BMW website

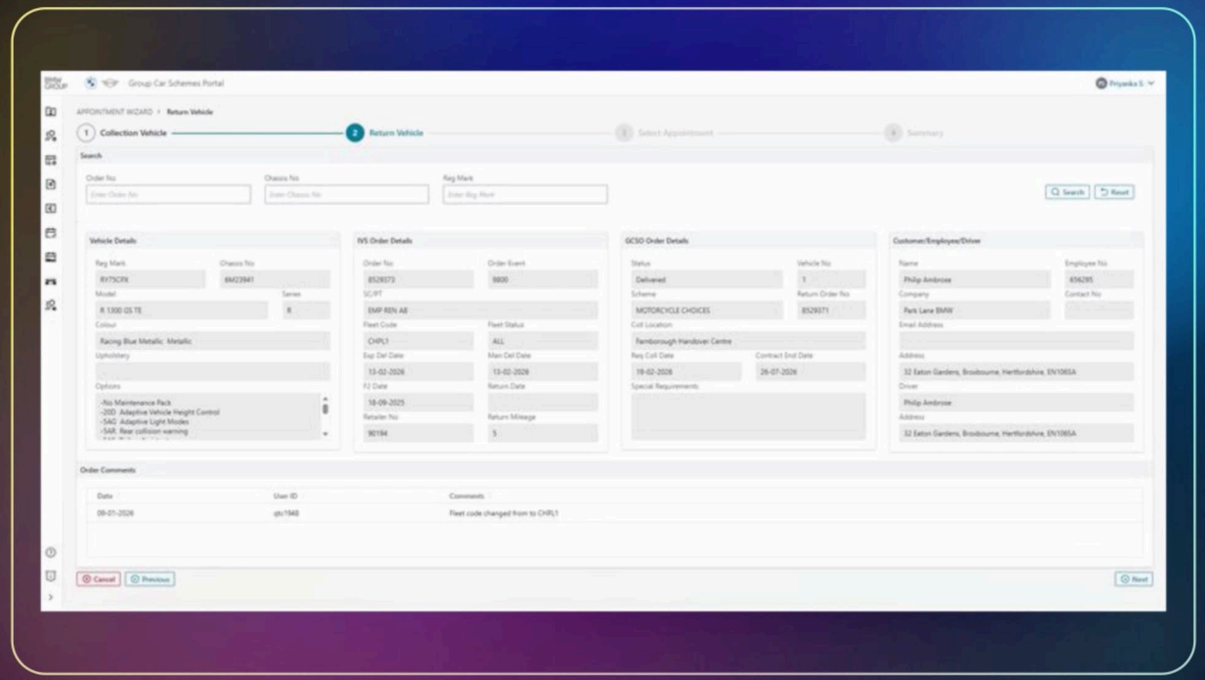

TRANSFORM MODERNISE STREAMLINE

OPTIMISE UNIFY

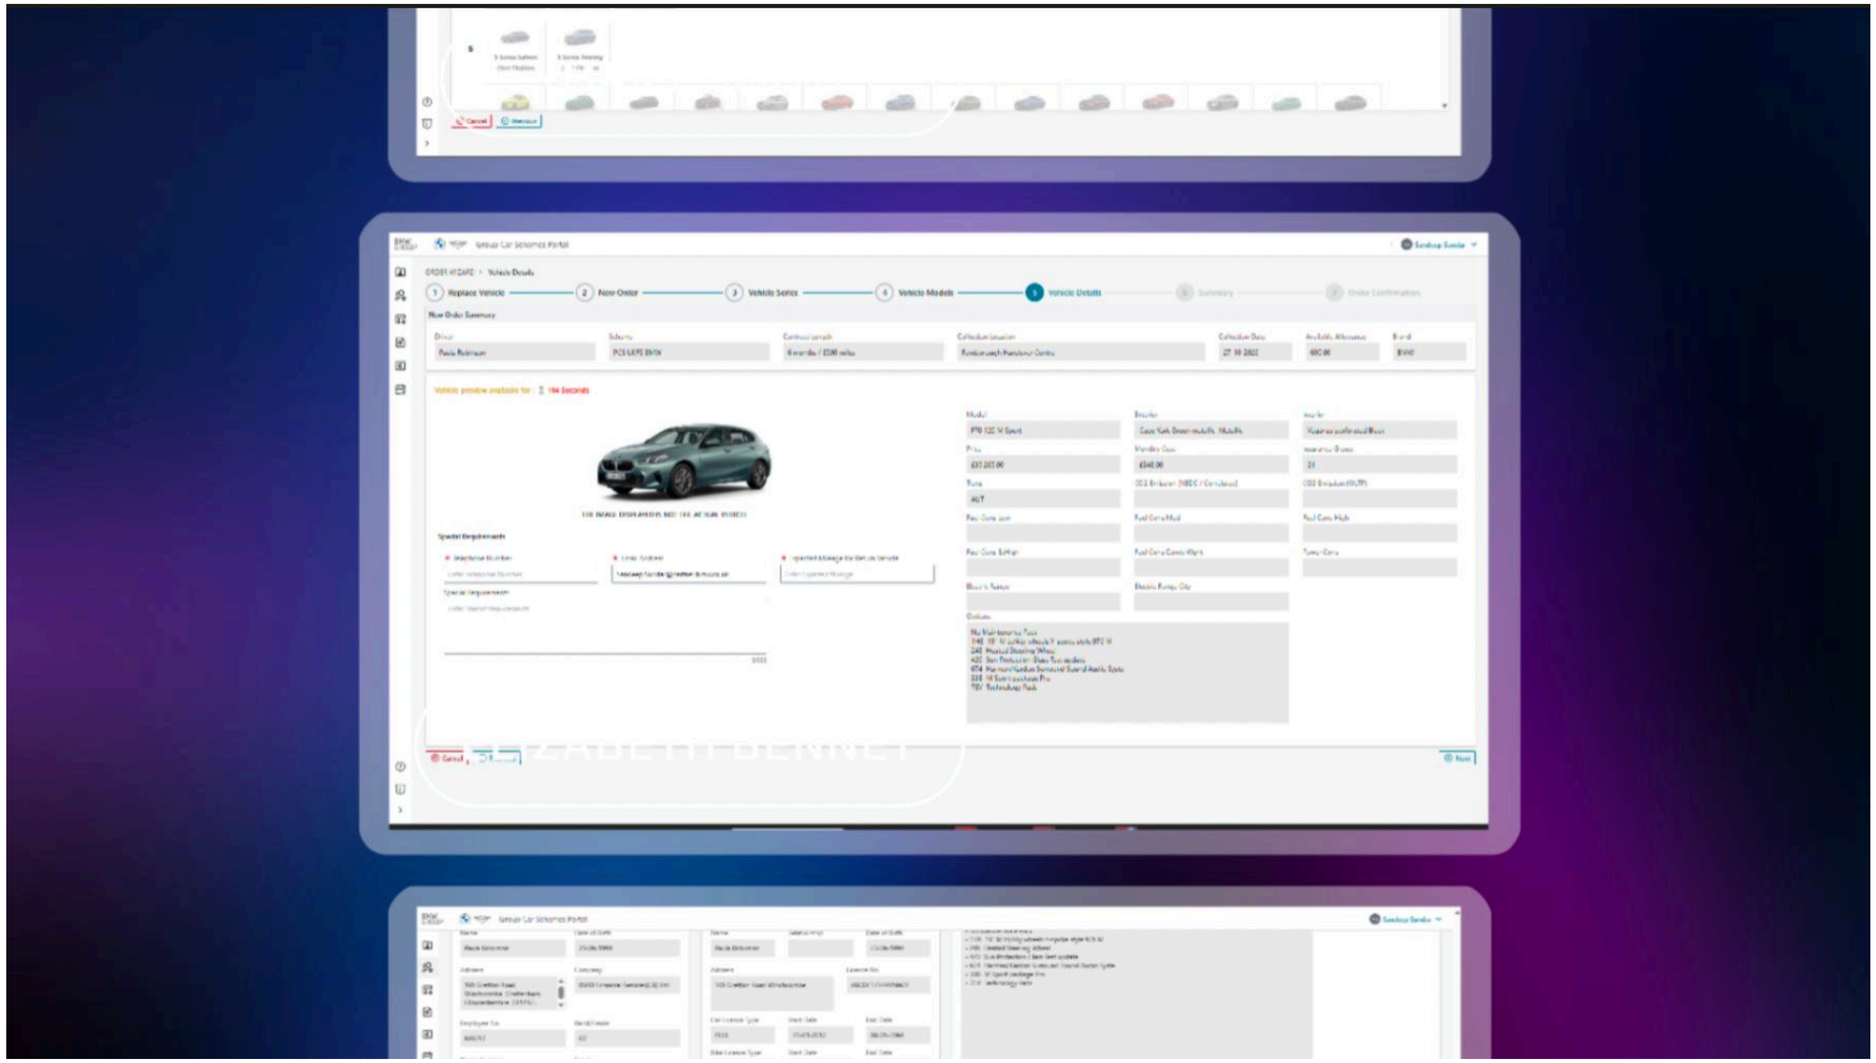

For over 15 years, the GCSO application has supported vehicle ordering across our car schemes—powering one of BMW Group UK's most valued employee benefits.

transform GCSO into a unified high-performance platform

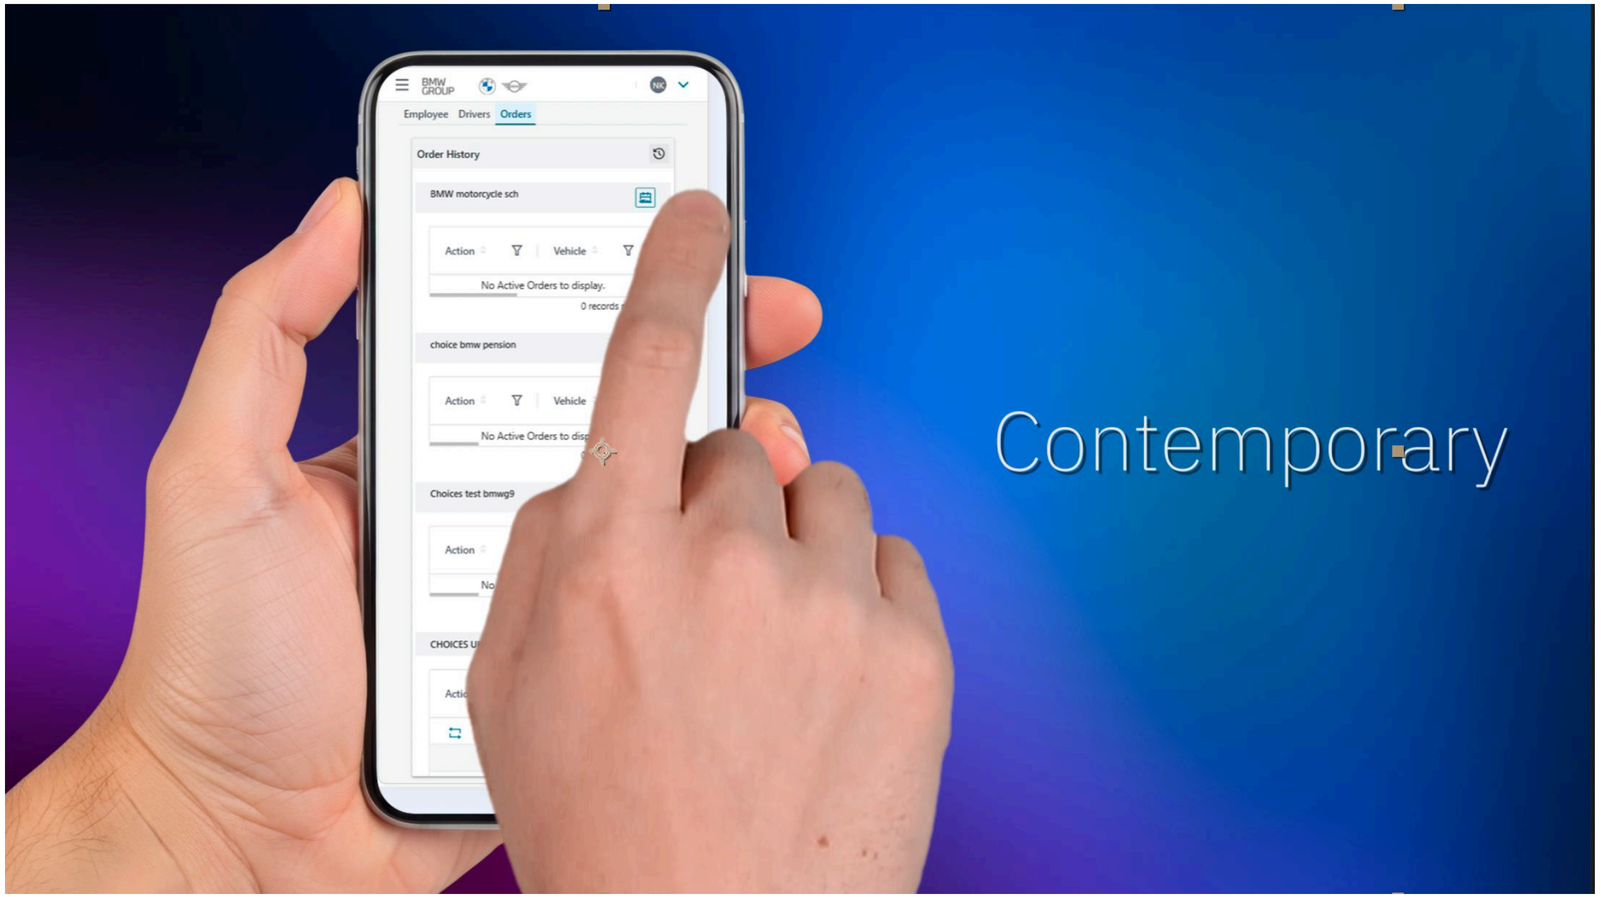

Show a car running on the road
should start with modern ui screens

Now, we are investing in **modern technology** to transform GCSO into a unified, high-performance platform—the **Group Car Schemes Platform.**

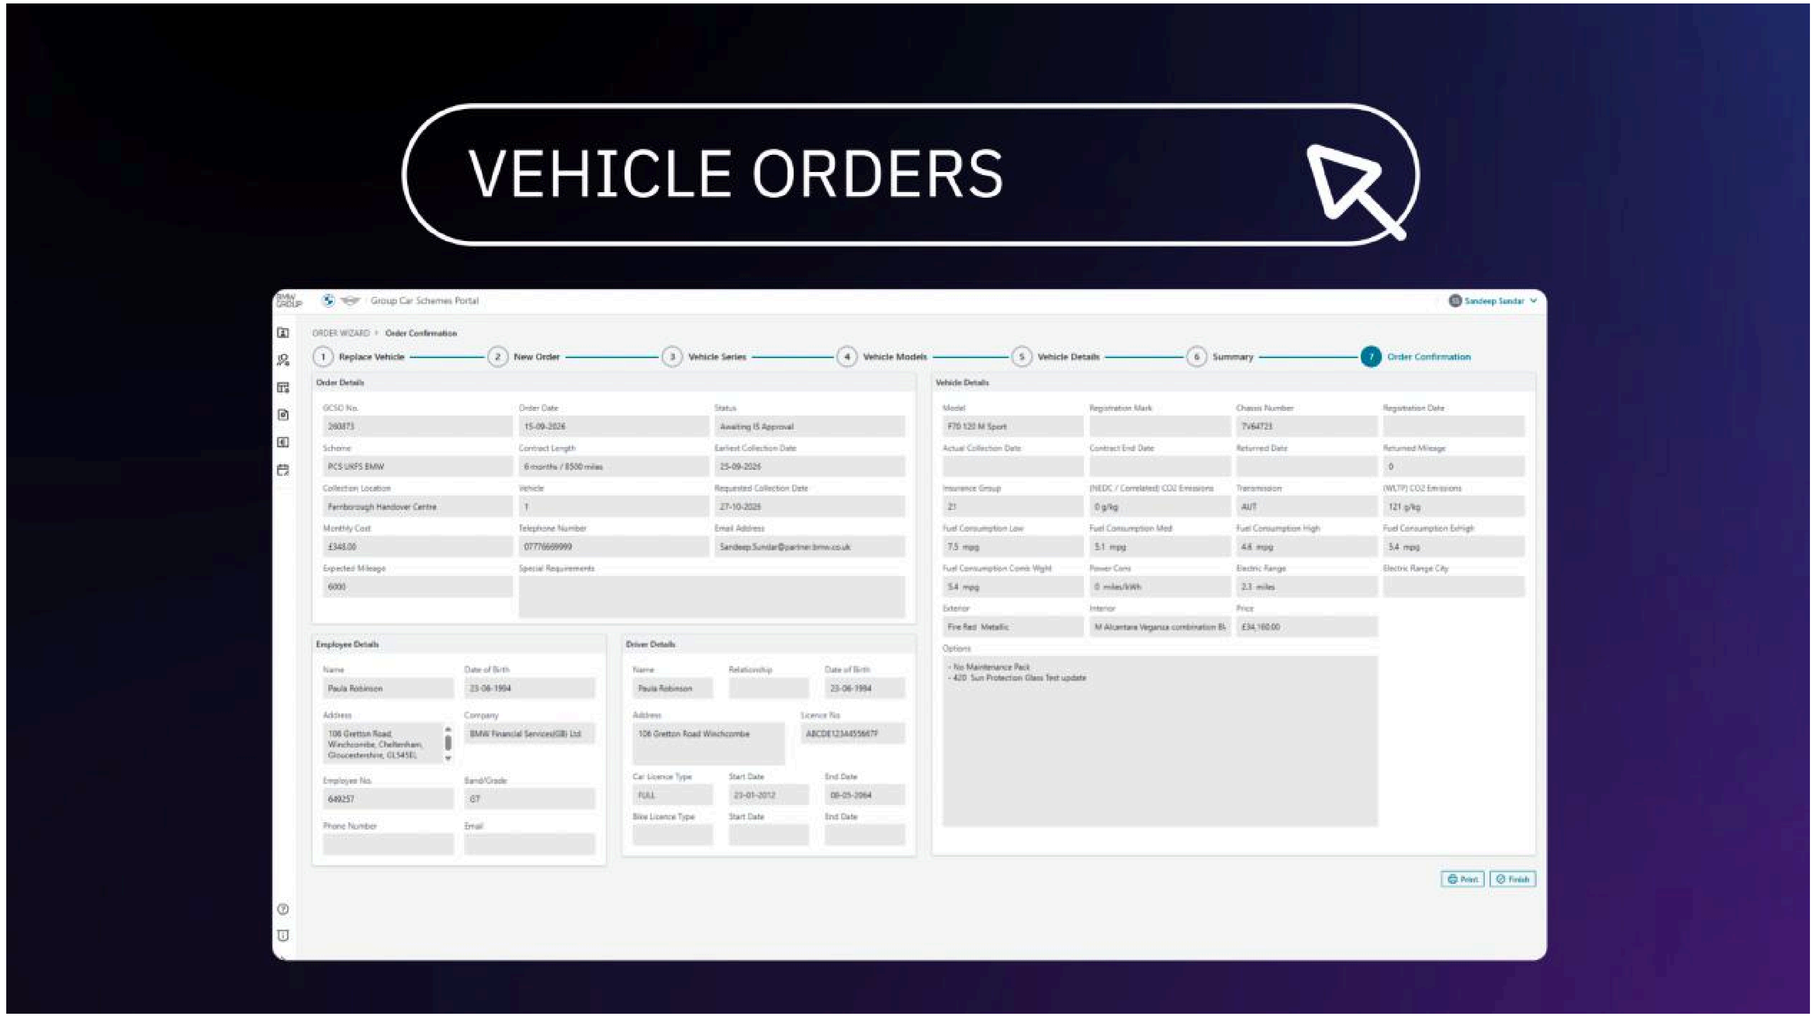

Add carousel https://stock.adobe.com/in/templates/modern-carousel-04/2188880241

The Group Car Scheme itself isn’t changing—only the technology supporting it. Your core ordering journeys remain familiar, but with a significantly more **modern and intuitive user experience.**

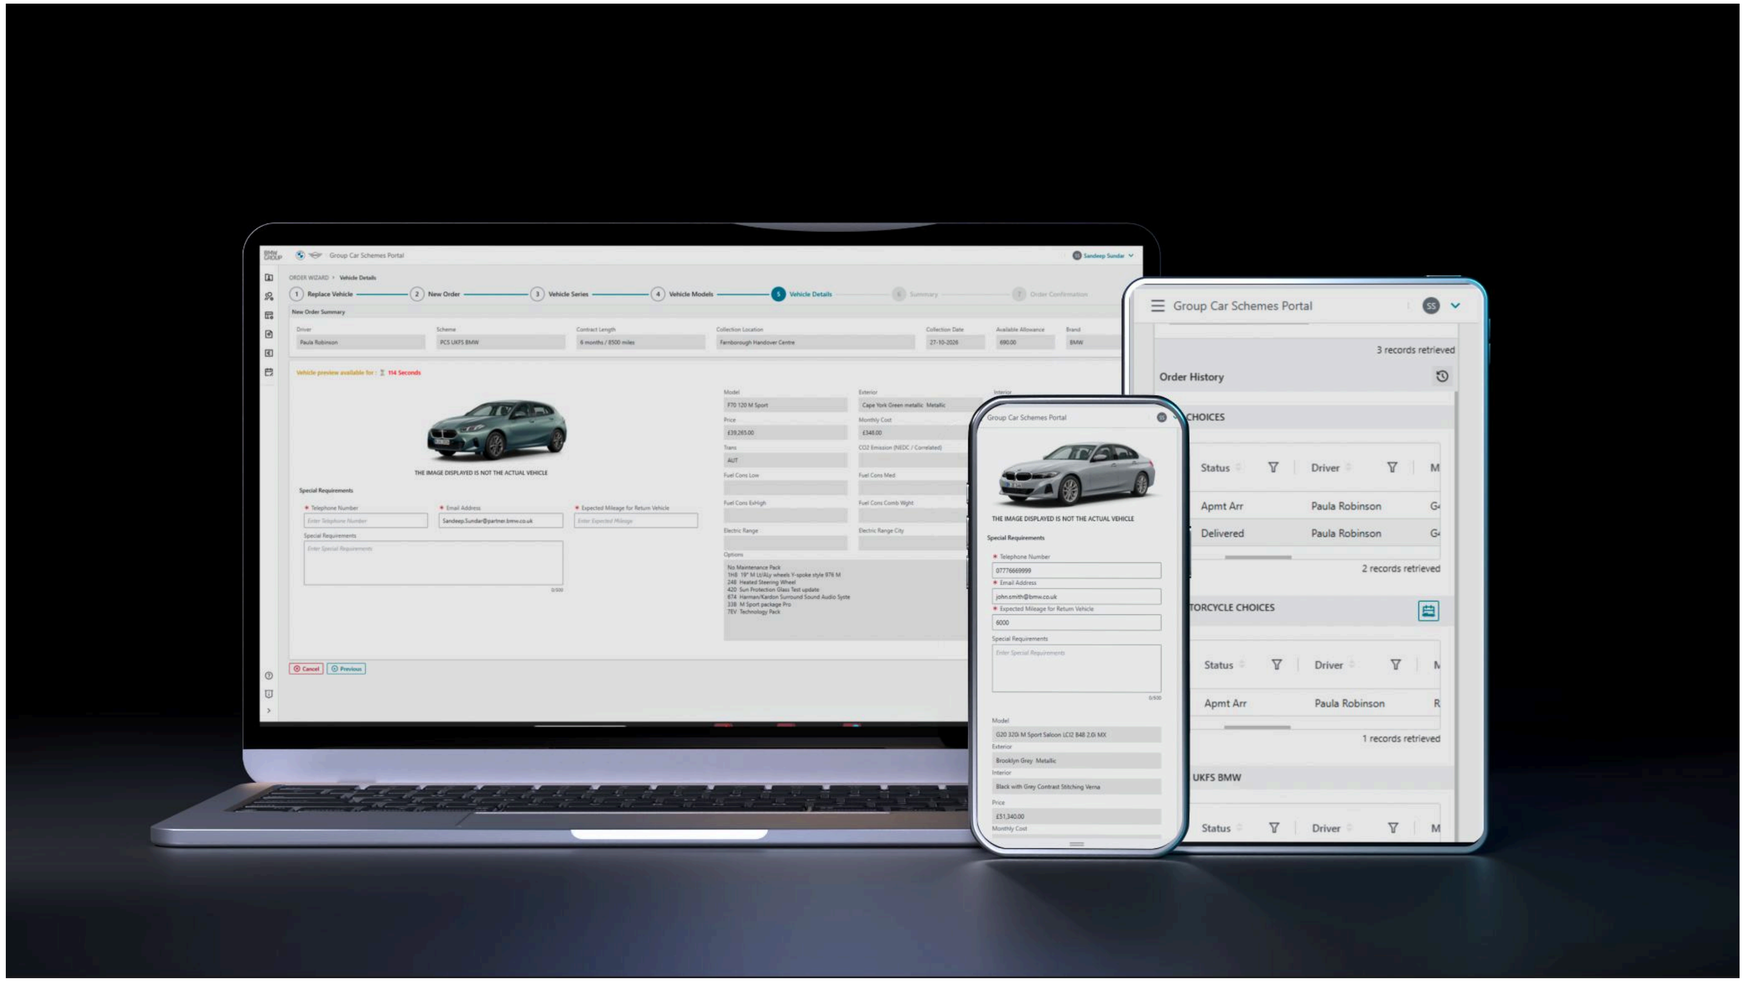

Use interaction accessing app from mobile version

Built using the standard BMW **Density design framework**, GCSP brings a **sleek, consistent, and contemporary BMW Group aesthetic to every interaction.**

Popup every screen once its clicked animation

From guided ordering journeys to **smarter search** with enhanced results, everyday tasks are faster to navigate—while your existing **vehicle orders, appointments, and login credentials transfer seamlessly** without disruption.

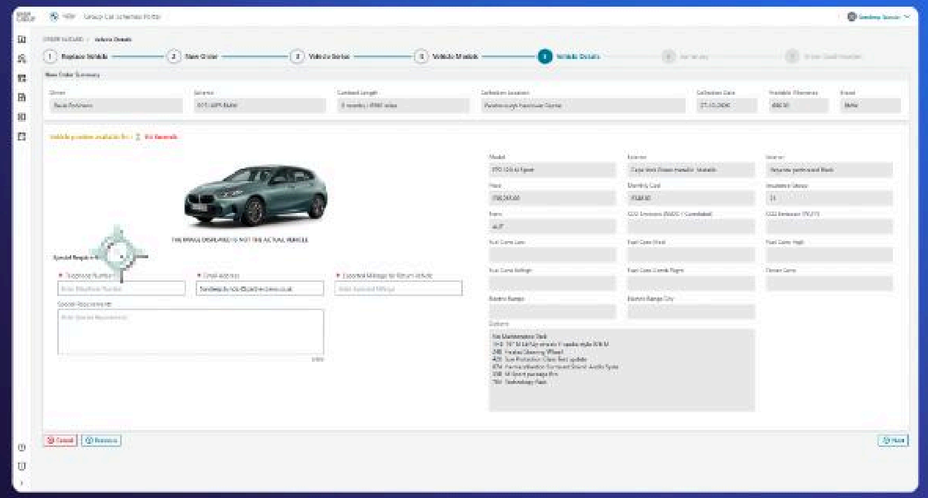

show ui screens in all 3 devices

GCSP operating smoothly across company-owned **desktop, tablet, and mobile devices** within the corporate environment.
[On-screen callout / text overlay: *Available on company-owned devices connected to the corporate network.]

UPGRADED PLATFORM

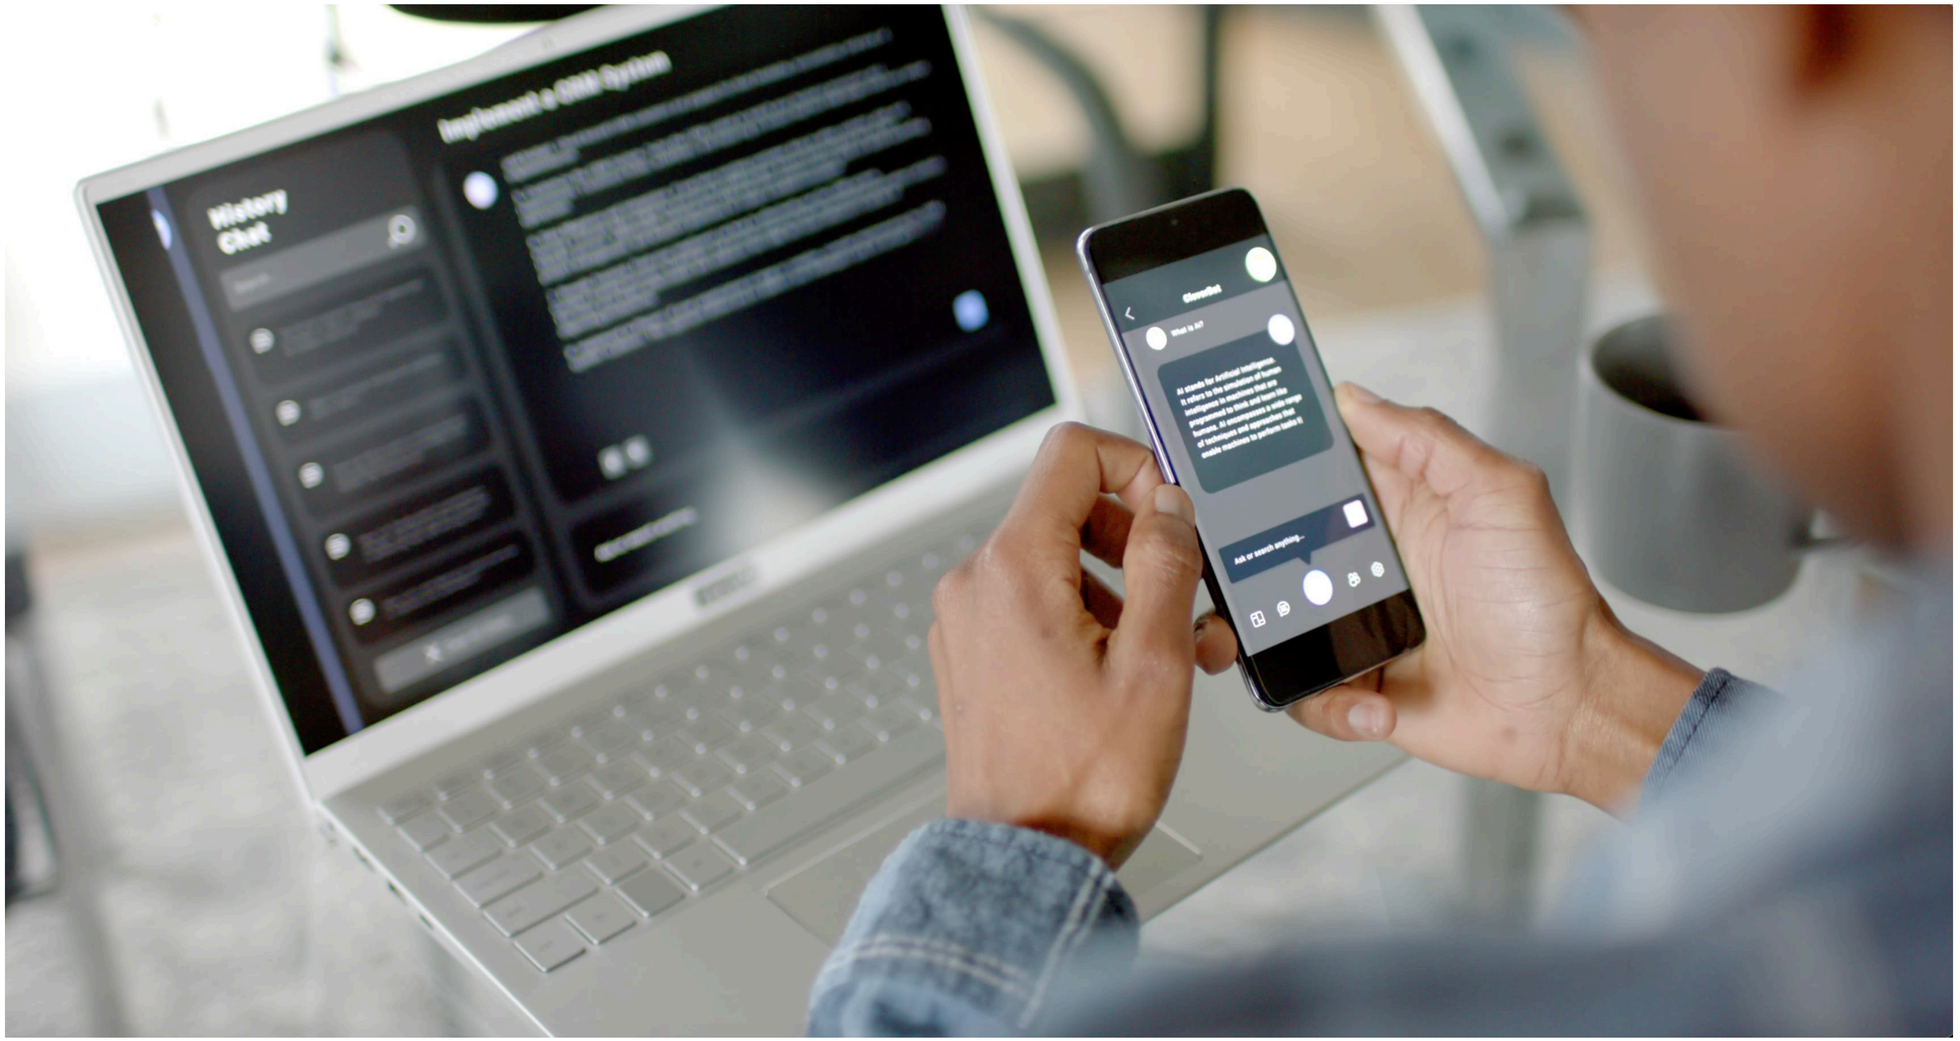

RELIABILITY

ENTERPRISE-GRADE SECURITY

nice transitions might work with UI screens

GCSP delivers upgraded platform **reliability and enterprise-grade security**. This is just the first step in a broader **transformation** that will unlock new **innovation**, expanded features, and additional capabilities in the future.

GCSP. A modern, **intuitive experience** for today, built to drive future **digital innovation** tomorrow.
